SUPPLEMENTARY INFORMATION:

Introduction

The Privacy Act (5 U.S.C. 552a(e)(4) and (e)(11)) requires the Department to publish in the Federal Register this notice of a new system of records maintained by the Department. The Department's regulations implementing the Privacy Act are contained in part 5b of title 34 of the Code of Federal Regulations (CFR).

The Privacy Act applies to any record about an individual that is maintained in a system of records from which individually identifying information is retrieved by a unique identifier associated with each individual, such as a name or Social Security Number (SSN). The information about each individual is called a "record," and the system, whether manual or computer-based, is called a "system of records."

The Privacy Act requires each agency to publish a notice of a system of records in the Federal Register and to prepare and send a report to OMB whenever the agency publishes a new system of records or makes a significant change to an established system of records. Each agency is

also required to send copies of the report to the Chair of the Senate Committee on Homeland Security and Governmental Affairs and the Chair of the House Committee on Oversight and Government Reform. These reports are intended to permit an evaluation of the probable effect of the proposal on the privacy rights of individuals.

The system will contain personally identifying information on approximately 12,000 students, 500 teachers, and 104 principals from 104 schools in 12 school districts and will include, but will not necessarily be limited to, data on: (1) for students, standardized math and English/Language Arts test scores, age, sex, race/ethnicity, grade, eligibility for free/reduced-price lunches, English Learner status, individualized education plan status, school enrollment dates, attendance records, and discipline records, and (2) for principals and teachers, individual district identifiers, school assignments, grades and subjects taught, and principal and teacher background characteristics, including age, sex, race/ethnicity, certifications, degrees, years of teaching experience, scores on licensure or certification tests.

Secondary research questions for the study are: How are schools implementing data-driven instruction? What challenges do schools face in its implementation?

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Department may disclose information contained in a record in this system of records under the routine uses listed in this system of records without the consent of the individual if the disclosure is compatible with the purposes for which the record was collected. The Department may make these disclosures on a case-by-case basis or, if the Department has complied with the computer matching requirements of the Privacy Act of 1974, as amended (Privacy Act), under a computer matching agreement. Any disclosure of individually identifiable information from a record in this system must also comply with the requirements of section 183 of the ESRA (20 U.S.C. 9573) providing for confidentiality standards that apply to all collection, reporting, and publication of data by the Institute of Education Sciences. POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Department will maintain records on CD-ROM, and the contractor and sub-contractors will maintain data for this system on computers and in hard copy.

RETRIEVABILITY:

Records in this system will be indexed and retrieved by a unique number assigned to each individual that will be cross-referenced by the individual's name on a separate list.

SAFEGUARDS:

All physical access to the Department's site and to the site of the Department's contractor and sub-

contractors, where this system of records will be maintained, will be controlled and monitored by security personnel. The computer system employed by the Department offers a high degree of resistance to tampering and circumvention. This security system limits data access to Department and contract staff on a need-to-know basis and controls individual users' ability to access and alter records within the system.

The contractor will establish similar procedures at its site to ensure confidentiality of data. The contractor is required to ensure that information identifying individuals is in files physically separated from other research data and electronic files identifying individuals are separated from other electronic research data files. The contractor will maintain security of all master data files and documentation. Access to individually identifiable data will be strictly controlled. All information will be kept in locked file cabinets during nonworking hours, and work on hardcopy data will take place in a single room, except for data entry.

Physical security of electronic data will be also maintained. Security features that protect project data will include: password-protected accounts that authorize

users to use the contractor's system but to access only specific network directories and network software; user rights and directory and file attributes that limit those who can use particular directories and files and determine how they can use them; and additional security features that the network administrators will establish for projects as needed. The Department's and the contractor's employees who "maintain" (collect, maintain, use, or disseminate) data in this system must comply with the requirements of the Privacy Act and the confidentiality standards in section 183 of the ESRA (20 U.S.C. 9573).
